

IDEAS THAT CONNECT | INNOVATION THAT DELIVERS

TPS is a leading provider of cards and payment solutions, powering digital payments for more than 130 commercial and central banks, telecoms, processors and financial institutions. Our customer base spans across the Middle East, South Asia, Africa and Europe and continues to increase across other regions.

Aiming at revolutionizing conventional banking, we excel in the planning and delivery of comprehensive digital payment solutions for banks and financial institutions. We are relentless in our pursuit of continuous innovation to provide leading payment solutions for issuers, acquirers, payment switches, multi-channel or online banking and alternative payment providers.

With our diverse experiences in cashless payment systems, we offer real-time payment capabilities enabling our clients to minimize time-to-market, unlock new revenue streams, reduce risks and control costs. We are a trusted payment solution provider for more than 20 years. Our cutting-edge, future-proof payment solutions are synonymous with trust, reliability and scalability.

Why TPS

TPS is the go-to, strategic payment partner that understands your needs, assesses your challenges and enables you to take your business where it needs to go. Whether it is analyzing the existing payment infrastructure, providing strategic consultancy or transforming your business from traditional to digital,

TPS is the partner of choice. We bring value to your business helping you to generate new revenue streams, explore new markets, increase coverage and

reach with a reduced time to market. We use our strong industry alliances to offer products, services and knowledge-share matching your business requirements. When businesses think of strategic payment partners, they think of TPS. Here is how we support our clients in their digital transformation journey:

Project Management

Our planning and processes are led by seasoned project managers employing proven methodologies

that enable us to leverage resources efficiently, deliver large and complex projects timely and within budget. Our project managers have acquired extensive domain knowledge working in various regions and systems. With extensive deployment experience in the cards and payments domain, they have successfully delivered various mission-critical projects that have drastically improved the digital payments landscape in our target markets. The combination of expertise and practical experience positions TPS uniquely to ensure your business gets to where it needs to.

Professional Services

Your digital transformation journey is driven by a strategy you set in motion by taking the right steps toward the right objective. Our best-in-class payment solutions are complemented by guidance and support from our highly skilled professional services team. Our experienced business and technology professionals conduct a deep dive exercise to

understand your needs and create the mix that is right for you. With our vast industry experience, we know how to help you fulfill your digital services strategy with speed and confidence.

Technical Support

We believe in building strong customer relationships and our support teams are available to ensure stability and seamless operations. We are accessible, available and responsive to ensure your experience with TPS is smooth and hassle-free. Our technical support procedures are well defined to meet the best available SLA's in the industry. Our strong support functions allow our customers to offer e-banking services to their consumers resulting in billions of daily, real-time transactions. From concept to planning, from design and implementation to upgrades and customer support, we are committed to the complete project lifecycle.
